2022 Census of Agriculture now underway in North Carolina

Raleigh, NC – December 23, 2022 – Earlier this week the U.S. Department of Agriculture (USDA) mailed the 2022 Census of Agriculture paper questionnaires to all known agriculture producers across the nation and Puerto Rico. Last month, producers in the states received their survey codes with an invitation to respond online. Any North Carolina producer who did not respond online now has the option to complete the ag census at agcounts.usda.gov or by mail. Producers who have already responded to the 2022 Census of Agriculture online do not need to respond again. The deadline for response is Feb. 6, 2023.

“NC farmers have consistently provided quality and invaluable data in support of the agriculture industry. NC farmers understand responding to the census is an opportunity for their voices to be heard and to direct their future,” said USDA National Agricultural Statistics Service (NASS) NC State Statistician, Dee Webb. “We are asking our NC farmers and producers to continue to provide this excellent dedication by responding online or returning a completed paper questionnaire by the February deadline.”

The Census of Agriculture remains the nation’s only comprehensive and impartial agriculture data for every state, county, and U.S. territory. Farm operations of all sizes, urban and rural, which produced and sold, or normally would have sold, \$1,000 or more of agricultural products in 2022, are included in the ag census. The data inform decisions about policy, programs, rural development, research, and more. The Census of Agriculture is the producer’s voice in the future of American agriculture.

Responding to the Census of Agriculture is required by law under Title 7 USC 2204(g) Public Law 105-113. The same law requires NASS to keep all information confidential, to use the data only for statistical purposes, and only publish in aggregate form to prevent disclosing the identity of any individual producer or farm operation. NASS will release the results of the ag census in 2024.
